

It's a good year for a one-year

Delivering better results through a one-year strategy

When you look at it in terms of growth, performance and client experience, a one-year strategy offers several advantages compared to two- and three-year strategies. Let's compare how a 3-year vs. 1-year crediting option would perform during different time periods based on a \$100,000 investment in a fixed indexed annuity.

Running the numbers

In the table below, the example on the left assumes an 18% return over three years and the example on the right assumes a 6% return each year for three years.

3-year strategy	1-year strategy
Year 1: \$100,000	Year 1: \$106,000
Year 2: \$100,000	Year 2: \$112,360
Year 3: \$118,000	Year 3: \$119,102
18% over 3 years = 18% credited to the account	6% per year = 19.1% credited to the account

⊘

The 1-year strategy outperformed the 3-year strategy since the interest was applied, locked in, and compounded each year.

The table below shows how a 3-year strategy with a 55% participation rate compares to a 1-year strategy with a 40% participation rate tied to the S&P 500 Index.¹ Interest was credited every three years, and every year respectively, over the time periods shown.

3-year strategy	1-year strategy	
1/1/1999 – 1/1/2011		
14% return Account value: \$113,725	49% return Account value: \$148,514	
1/1/1999 – 1/1/2023		
117% return Account value: \$217,088	171% return Account value: \$271,248	

Even with a lower participation rate, the 1-year strategy outperformed the 3-year strategy with the help of more frequent compounding interest.

A participation rate is the percentage of the index's return the insurance company credits to the annuity. The examples on the right are results based on the participation rate and are total returns over the time periods shown.

Talk to your financial professional today about the power of a one-year fixed indexed annuity strategy.

¹The S&P 500 Index results are actual performance for the full period, without dividends. Past performance is not indicative of nor does it guarantee future performance. A participation rate is the percentage of the index's return the insurance company credits to the annuity. The actual rate will be determined at contract issue and is declared annually by the issuing company at its discretion. Subsequent interest rates may be higher or lower than the initial one and may be different from those used for new contracts.

Important information:

Lincoln Financial Group® affiliates, their distributors, and their respective employees, representatives, and/or insurance agents do not provide tax, accounting, or legal advice. Please consult an independent professional as to any tax, accounting, or legal statements made herein.

A fixed indexed annuity is intended for retirement or other long-term needs. It is intended for a person who has sufficient cash or other liquid assets for living expenses and other unexpected emergencies, such as medical expenses. A fixed indexed annuity is not a registered security or stock market investment and does not directly participate in any stock or equity investments, or index.

Lincoln fixed indexed annuities (contract form ICC1515-619 and state variations) are issued by The Lincoln National Life Insurance Company, Fort Wayne, IN, and distributed by Lincoln Financial Distributors, Inc., a broker-dealer. **The Lincoln National Life Insurance Company does not solicit business in the state of New York, nor is it authorized to do so. Contractual obligations are subject to the claims-paying ability of The Lincoln National Life Insurance Company.**

This annuity does not participate directly in any stock or equity investment and does not include the purchase of shares of stock or an index. The indexed accounts use an outside market index as a benchmark for determining indexed account earnings. Any dividends paid on the stocks on which the index is based do not increase the annuity earnings. All payments and values provided by the contract, when based on performance of the indexed account, are not guaranteed to be equivalent to the benchmarking index. The composition of the index and the methodology used by the index to calculate its performance are not guaranteed and may be changed at any time by the index provider.

The exact terms of the annuity are contained in the contracts and any attached riders, endorsements and amendments, which will control the issuing company's contractual obligations. For more information about the annuity, please also read the Client Guide, Disclosure Statement and Fact Sheet, or contact your representative.

Income taxes are due upon withdrawal and if withdrawn before age 59½, an additional 10% federal tax may apply. Withdrawals and surrenders may be subject to surrender charges and a Market Value Adjustment.

There is no additional tax-deferral benefit for contracts purchased in an IRA or other tax-qualified plan, since they are already afforded tax-deferred status.

Product and features are subject to state availability. Limitations and exclusions may apply. Not available in New York.

For use with the general public.

Not a deposit

Not FDIC-insured

Not insured by any federal government agency
