Other strategies to help you manage your investment

- Asset allocation⁹
- Dollar cost averaging¹⁰
- Portfolio rebalancing¹¹

The Defined Outcome Funds employ a strategy to provide buffer protection, which includes a capped upside return risk and an outcome period risk. These strategies could limit the upside participation of the fund in rising equity markets relative to other funds. The buffer provides protection in the event of a market downturn. This may conflict with your investment objectives by limiting your ability to maximize growth of your contract value and the value of your guaranteed benefits.

For more information on these funds and their strategies, please see the funds' prospectus.

Annuities with credits or reduced surrender charge periods generally have higher expenses.

- ¹ Withdrawals of taxable amounts are subject to income tax and may be subject to an additional 10% federal tax if taken prior to age 59½. Withdrawals will reduce the contract value, living benefits and death benefits, and are treated as gains out first.
- ² To be eligible for the credit during the first contract year, on each quarterly anniversary a contract must have purchase payments less withdrawals or an account value of \$250,000 or more. To be eligible for the credit after the first contract year, on each quarterly anniversary a contract must have an account value of \$250,000 or more.
For contracts that are eligible for the credit on a quarterly anniversary, the amount of the credit during the first contract year will be the greater of purchase payments less withdrawals or the contract value less any amount in the dollar cost averaging (DCA) Fixed Account, multiplied by the quarterly large account credit. The amount of the credit after the first contract year will be the contract value less any amount in the DCA Fixed Account, multiplied by the quarterly large account credit.
- ³ All features are subject to state and firm approvals. Please see your registered representative for details. You can elect to end these benefits after five years, or, with *i4LIFE®*, before the Access Period ends.
- ⁴ There is a credit to clients who select a minimum Access Period of the greater of 20 years or until age 85 – with a \$500,000 deposit the credit is 0.10% annually and with a \$1,000,000 deposit the credit is 0.20% annually (see prospectus for complete details).
- ⁵ Due to the structure of the Defined Outcome Funds, transfer or any reallocations must be made by 2:00 p.m. EST or they will be processed the next day. The Lincoln Defined Outcome Funds have characteristics unlike many other traditional investments and may not be suitable for all investors. There is no guarantee that the outcomes for an outcome period will be realized. For more information regarding whether an investment in these funds is right for you, see the prospectus.
- ⁶ There is no additional tax-deferral benefit for an annuity contract purchased in an IRA or other tax-qualified plan.
- ⁷ Maximum charge of 1.40% and 1.70%, respectively, based on oldest issue age. The initial fee is guaranteed for 20 years after election. The rider is irrevocable and does not provide an opt-out provision for fee increases. Investment requirements apply.
- ⁸ For C-Share contracts only, the issue age extends to age 90. However, for ages 86 – 90 the contract must be nonqualified and you must elect *i4LIFE®* Advantage immediately or as a beneficiary payout option.
- ⁹ Neither asset allocation nor diversification assures or guarantees better performance and cannot eliminate the risk of investment loss.
- ¹⁰ Not available with Defined Outcome Funds.
- ¹¹ Dollar cost averaging (DCA) and portfolio rebalancing cannot be elected simultaneously. Neither DCA nor portfolio rebalancing assures a profit or protects against loss in declining markets. Because DCA involves continuous investment regardless of changing price levels, clients should consider their ability to continue purchasing through periods of all price levels.

Variable annuities are long-term investment products designed for retirement purposes and are subject to market fluctuation, investment risk, and possible loss of principal. Variable annuities contain both investment and insurance components and have fees and charges, including mortality and expense, administrative, and advisory fees. Optional features are available for an additional charge. The annuity's value fluctuates with the market value of the underlying investment options, and all assets accumulate tax-deferred. Withdrawals of earnings are taxable as ordinary income and, if taken prior to age 59½, may be subject to an additional 10% federal tax. Withdrawals will reduce the death benefit and cash surrender value.

Investors are advised to consider the investment objectives, risks, and charges and expenses of the variable annuity and its underlying investment options carefully before investing. The applicable prospectuses for the variable annuity and its underlying investment options contain this and other important information. Please call 888-868-2583 for free prospectuses. Read them carefully before investing or sending money. Products and features are subject to state availability.
